**K8 AG LAGO COOP**  
*1069 Sanborn Avenue 90029 San Angeles*

The house was started sometime in 2005 when a woman moved down here in Berkeley to go to school and her partner had a car that could have a creative living situation in Los Angeles and make it as sustainable as possible. She recruited some local left-minded activists and primitivist who were able to transform the cement block parking lot into a functioning garden. I moved in September 2006 when only one of the originals was still there. In that time we had two people living outside, one in the basement and I think another eight or nine inside.

**L10 CHARLIE'S COMPOUND**  
*Los Angeles River, South of Olympic*

The compound is basically a half-mile stretch of riverbed hillside between two warehouses and a parking lot. Charlie carved the wild chingdiggers by hand, first forging an encircling space and then working his way through the bamboo forest to create an elaborate path filled with his amazing landscape architecture. The garden is the last of his wild paint on the walls. The building owners love him, and so do many locals, mostly river rats and graffiti writers as well as a few local movie people who are drawn to the compound. This local established artist Charlie uses the hillside area for his gardens where he grows tons of various fruits and veggies, he gives the surplus to local churches and homes. The ground level pathway meanders through bamboo clumps and is decorated from hand toed with various odds and ends Charlie has found which give it a Disneyland cum swamper magical feel.
